The companion for 'Jeff Wayne's
War of the Worlds' © PC Game

The companion for 'Jeff Wayne's
War of the Worlds' © PC Game provides an upgrade to fix problems with Jeff
Wayne's war of the worlds PC RTS game.

LightQuick has created a website for the WOTW
Companion PC game software at wotwcompanion.co.uk. The
WOTW Companion required a website in order to publicise a software
package that had been written to complement
'Jeff Wayne's War of
the Worlds' © PC Game.
LightQuick created the site for the WOTW
Companion and help to create a new identity and new logo.

We created the WOTW
Companion's main website using traditional HTML technology based upon a
photoshop template. However,
it is such a nice and totally unique site that we still like to demonstrate it.
The good thing
about photoshop is that you can create your own absolutely unique graphic
template and then slice it up into chunks that can be displayed as an HTML web
page. This site shows that if you require a completely unique site that is not
based upon any pre-existing template then we can do it for you using traditional
HTML techniques and advanced graphic design. The site is very fast loading and the response times are always good,
no delays on this one. This is still one of my personal favourite-looking sites. If you'd like us to make a site like this we'd
be more than happy to do so.

Click on the image
below to be taken directly to WOTW Companion website.

Optimisation:

Search engine optimisation is not in place for the WOTW Companion website as it is not part of the website requirement. This product fits into a niche market and it does the job without search engine optimisation.
